

Smartphone Recharge

Docking and charging station for smartphones

MAIN CHARACTERISTICS

- Houses and charges 21/14 smartphones;
- Sliding trays for easy access to each phone;
- Charges different brands and models of smartphones at the same time;
- Housing of the smartphones on a **numbered and pre-formed mat**, designed to keep the phones and charging cables tidy;
- 230Vac power supply with a single Shuko plug and **6A magnetothermic protection**;
- **Wall or floor mounting**;
- 24 months warranty.

DESCRIPTION

The **Smartphone Docking and Charging Station** is an innovative charging system suitable for any type of phone, ideal for safely housing and storing your device and ensuring its recharge without any clutter.

Its features make it suitable in many areas, such as: logistics centres, specialized shops and chain stores.

The **Charging Station** can hold up to 21 smartphones on 3 different pull-out shelves. Each shelf has 7 numbered and pre-formed phone positions, designed to provide order and full accessibility to the charging cables.

The cabinet is equipped with a **Plexiglas front door with key operated lock and tinted film** thereby concealing the content. Both **side panels are removable** to allow greater accessibility during the initial installation of the power supplies and related charging cables.

The integrated **power strips** in the cabinet are suitable to accommodate the original power supplies of the smartphones, while the indicator lamps allow to control, even with the door closed, the presence of the 230Vac power supply.

Model	Positions	Installation	Colour	CABINET DIMENSIONS			SLOT DIMENSIONS	
				Width	Depth	Height	Width	Height
ARR21SR	21	Wall	RAL7032	600mm	513mm	626mm	74mm	130mm
